Modulgrav II, the proven and compact module engraving machine

Modulgrav: new design with improved engraving precision and clear indication of font size and stretching degree.

- Accurate, simple to operate, quick to change over, space-saving and economical
- Flat engravings on jewellery pieces and signboards by diamond or cutter
- Stepless, reproducible variation of font size 0.8 – 6.5 mm (via adjusting screw and front scale)
- Font stretching device up to 100 % (for short names the font can be stretched by up to 100 %)
- Wide range of optional accessories, such as different fonts, templates, special characters and monograms
- Good for gold, silver, platinum and stainless steel
